ORDER NO. 06-547
 ENTERED 09/26/06
BEFORE THE PUBLIC UTILITY COMMISSION OF OREGON
 AR 506
 In the Matter of
 Rulemaking to Amend and Adopt Permanent Rules in OAR 860, Divisions 024 and 028, Regarding Pole Attachment Use and Safety.

Prioritization of Repairs

The rules adopted today require immediate treatment of any violation "that poses an imminent danger to life or property." Other violations must be fixed within two years of discovery. If there is little or no foreseeable risk of danger, the operator has a plan to fix the violation, *and* all attachers on the relevant pole agree, some violations may be deferred to be fixed during the next major work activity, but no more than ten years after discovery of the violation.

860-024-0012

Prioritization of Repairs by Operators of Electric Supply Facilities and Operators of Communication Facilities

(1) ~~A violation of the Commission Safety Rules that poses an imminent danger to life or property must be repaired, disconnected, or isolated by the operator immediately after discovery.~~

(2) Except as otherwise provided by this rule, the operator must correct violations of Commission Safety Rules no later than two years after discovery.

(3) An operator may elect to defer correction of violations of the Commission Safety Rules that pose little or no foreseeable risk of danger to life or property to correction during the next major work activity.

(a) In no event shall a deferral under this section extend for more than ten years after discovery.

(b) The operator must develop a plan detailing how it will remedy each such violation.

(c) If more than one operator is affected by the deferral, all affected operators must agree to the plan. If any affected operators do not agree to the plan, the correction of violation(s) may not be deferred.

(4) For good cause shown, or where equivalent safety can be achieved, unless otherwise prohibited by law, the Commission may for a specific installation waive the requirements of OAR 860-024-0012.

PRIOTIZATION OF REPAIR COMMITTEE GOALS

1. Develop communication protocols between joint use operators and PUC on deferred corrections.
2. Develop specific guidelines for classification of corrections.
3. Product developed by committee endorsed by PUC safety staff.
4. Entire industry is involved in process by conducting two workshops throughout the state.
